

# Our Impact

## Our Commitment to Environmental Protection and Sustainability

At Faithlegg, we are committed to reducing our environmental impact and embedding sustainable practices throughout our operations. Key initiatives include:

- **Deposit Return Scheme for Charity** – A bottle and can return scheme, established by Danielle in our Leisure Centre, helps divert recyclable materials from waste while raising funds for charitable causes.
- **Tetra Pak Water Cartons** – We have introduced more sustainable water packaging options, reducing reliance on single-use plastic bottles.
- **LED Lighting Throughout the Resort** – Energy-efficient LED lighting has been installed across the property, helping to reduce energy consumption and lower carbon emissions.
- **Pool and Jacuzzi Covers** – Thermal covers are used to retain heat, improving energy efficiency and reducing the resources required to maintain water temperatures.
- **Electric Vehicle Charging Stations** – EV charging facilities support guests and visitors who choose lower-emission transportation options.
- **Supporting Local Food Producers** – Our food philosophy prioritises sourcing from local suppliers and growers wherever possible, reducing food miles while supporting the local economy and showcasing the best regional produce.
- **Reducing Resource Consumption** – Through ongoing efficiency measures, we continue to identify opportunities to reduce waste, energy use, and water consumption across the resort.
- **Continuous Improvement** – Sustainability remains a core focus of our operations, with ongoing investment in initiatives that protect the environment while enhancing the guest experience.
